DUPLICATES REMOVED

1

BLANK ROW REMOVED

NO CUSTOMER DATA

Every name, phone number, and transaction is fictional. No client workbook appears in this sample.

Before and after - the same verified run

Formatting is normalized conservatively; unrecognized values stay visible for review.

Source CSV

6 rows, inconsistent formatting

CUSTOMER	ORDER DATE	AMOUNT
Avery North	03/14/2026	\$1,250
Avery North	2026-03-14	1250.00
Riley Harbor	03-15-2026	USD 89.5
Riley Harbor	03-15-2026	USD 89.5
(blank)	(blank)	(blank)
Morgan Juniper	not supplied	\$75.00

Cleaned CSV

3 unique, nonblank rows

CUSTOMER	ORDER DATE	AMOUNT
Avery North	2026-03-14	1250.00
Riley Harbor	2026-03-15	89.50
Morgan Juniper	not supplied	75.00

2 normalized duplicates removed

2 exceptions retained and warned

SAFE DEFAULTS

The unresolved date and phone values were not guessed. They remain in the output and are called out in both audit files.

CONSERVATIVE / REPEATABLE / AUDITABLE

A cleanup process you can verify

1

Profile

Inspect structure, blanks, duplicates, and format inconsistencies.

2

Clean

Apply agreed rules while preserving the original source.

3

Validate

Reconcile row counts, normalized fields, and retained exceptions.

4

Document

Deliver the cleaned file plus human and machine-readable audits.

DELIVERABLES

cleaned CSV / change report / JSON audit / file fingerprints

No raw cell values are copied into audit logs.

Verified tool version 1.0.0
